Introduction

A-Gas plays a critical part in modern life, and people around the world come into contact with what we do every day.

A-Gas is the world leader in the supply and lifecycle management of refrigerants and associated products and services.

For 30 years, through our first-class recovery, reclamation and repurposing processes, we have been capturing gas for further reuse or safe destruction, preventing its harmful release into the atmosphere.

Our Purpose

For 30 years, we have been protecting and enhancing the environment by effectively managing the lifecycle of refrigerants to build a sustainable future.

Leading global supplier of innovative solutions to the HVACR and fire protection industries.

Our Strategy Achieving Success

- The global leader in gas acquisition and recovery.
- Market-leading **lifecycle refrigerant management** offering to build a more sustainable future.

Building a Sustainable Future

Lifecycle Refrigerant Management (LRM):

- Supplying the Lowest Global Warming Potential (GWP) products.
- Reducing leakage and venting of gases into the atmosphere by recovering and reclaiming existing materials.
- We are at the forefront of our industry for sustainability, embracing the circular economy.

“Protect and enhance the environment by effectively managing the lifecycle of refrigerants.”

A-GAS[®]
TOGETHER WE CAN

Building a Sustainable Future

A-Gas has noted 2022 as a record year for refrigerant recovery and reclamation

- Totaling up all the used gases that the company's teams recovered, reclaimed or destroyed around the world can be expressed as the equivalent of taking 1.8 million vehicles off the road for a year or planting 123 million trees - making this year the company's best ever.
- The total number of carbon reductions last year was 8,617,743 tCO₂e, an increase of more than 1.1 million tonnes of CO₂e compared to the 2021 figure.
- Over a 12-month period, this is an impressive 15% increase.

A-GAS[®]
TOGETHER WE CAN

A-Gas Net-Zero Pledge

- A-Gas will be a **net-zero company by 2035**, and will reduce existing emissions by 50% by 2028.

Towards Zero, Together

- Encompasses our dedication to stay safe, protect our environment and prevent emissions to the atmosphere.

*Achieving net-zero is an ambitious target we cannot achieve alone, but **together, we can.***

A-GAS[®]
TOGETHER WE CAN

Zero Harm
Zero Leaks
Zero Emissions

Global Locations
